

Bicycle EcoShelter™
by Gardarica Ltd

Create It Green

Who are we?

Gardarica Ltd is an international group of environmental engineers, landscape architects and designers. We design and build functional products for urban and rural landscapes, using high-quality materials and the latest technology. Our aim is to create contemporary designs that promote regeneration.

Gardarica Bicycle EcoShelter

Storing bicycles outdoors can be challenging. They take up a lot of valuable space inside garages and sheds, they're bulky, and they're used frequently. Bicycles are also expensive and need to be stored somewhere safe. Padlocking them to a fence, or tucking them away inside a garden shed doesn't provide enough security. Traditional bike sheds are often too imposing and can be an eyesore in your garden.

Gardarica's bicycle EcoShelters blend in with your surroundings. With the option of adding patented Gro-wall™ for flowers and foliage, you can customise their look to suit your personal taste. They provide easy access to your bicycles and offer complete safety. Our bespoke designs consider the size, décor and functional needs of your bicycle storage, so you'll have a unique structure that's tailored just for you.

Why choose our bicycle EcoShelters?

Our EcoShelters offer more than just shed space. We fully customise each design to provide you with dedicated, practical bicycle storage. Here are some of the benefits of choosing our docks:

Ecofriendly

Plastic in our structures are made from 80% recycled ocean plastic, so are eco-friendly

Bespoke

Tailored designs with a range of cladding choices to suit your surroundings

Secure

Robust, well made structures that provide a high level of security

Discreet

Unassuming, elusive storage decorated with foliage

Practical

A sliding door system, designed exclusively by Gardarica, that provides easy access

Protected

Ventilated storage that shields your bicycles from the elements

Flexible

Can be combined with other Gardarica products

Additional options

Gardarica offers a variety of design options to make your bicycle EcoShelter look and feel unique.

Green roof only

To seamlessly integrate into tight spaces

Automatic irrigation
